

CLIMATE CHANGE

is one of the major challenges of our time and renewable energy is playing a major role in tackling it,
AND INDIA

launched a **100 "smart cities"** initiative - better transport systems, utilities, and energy

plans to boost wind energy production from **50,000 to 60,000 MW by 2022**

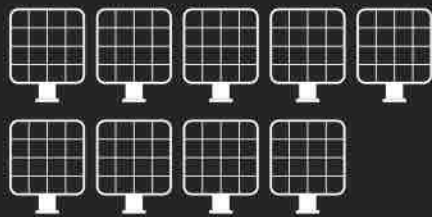

solar capacity increased from around **2.6 GW to more than 12.2 GW - 370%, in the last 3 years**

highest ever wind capacity of **5.5 GW** in 2016-17

plans to check **#ClimateChange** by reducing the CO2 intensity by under the **Copenhagen Accord 20-25% by 2020**

installed 9 times the number of solar pumps in 2014-17
1.1 Lakh Vs 1991-2014

renewable energy sector can create
300,000
new jobs by 2020

BE A PART OF THE RENEWABLE REVOLUTION IN INDIA WITH HFE AS YOUR TRUSTED PARTNER.
